Change Description:

Due to the unstable supply situation of the DC/DC-Converter used for CAN2-Interface supply, an alternative DC/DC converter was used in the CANlink mobile 3600 series for a limited amount of time. Since the supply situation is stable again, the originally qualified DC/DC-Converter will be used again.

See [PCN_20221130_DCDC_Converter_Change_CANlink_mobile_3600](#) for reference.**Identification method to distinguish the change:**

See serial number on type label.

¹ The proposed first ship date is the forecasted date that a customer may expect to receive changed products. This is determined by the estimated date of inventory depletion on the PCN issue date. This may be affected by fluctuations in supply and demand. Consequently, although customers should be prepared to receive changed products on this date, Proemion will continue to ship pre-changed products until a time in which the inventory has been depleted. This may result in pre-changed products being shipped to customers after this forecasted date.
