Change description:

To enhance the functionalities of the CANlink wireless 4000 a new firmware will be used for upcoming deliveries of the CANlink wireless 4000 devices. The firmware version 1.1.0 will be used from now on instead of the previous version 1.0.0. The firmware version can be read out of the device via the firmware programmer.

See also the attached release notes for more information about the new version.

You can always download the latest firmware including the release notes for installation on your devices from:

[Download Center - CANlink wireless 4000 \(Firmware\)](#)

Also, the labels received an update due to layout changes and the availability of the UKCA certification.

Identification method to distinguish the change:

See firmware version in Firmware Programmer.

Qualifiable impact on quality and reliability:
 No impact on form, fit and previous functions.

Proposed first ship date*: As soon as possible.

* The proposed first ship date is the forecasted date that a customer may expect to receive changed products. This is determined by the estimated date of inventory depletion on the PCN issue date. This may be affected by fluctuations in supply and demand. Consequently, although customers should be prepared to receive changed products on this date, Proemion will continue to ship pre-changed products until a time in which the inventory has been depleted. This may result in pre-changed products being shipped to customers after this forecasted date.

Last time order for devices: Not applicable.
 Last time ship for devices: Not applicable.
 End of Repair-Service for devices: Not applicable.
 End of Support for devices: Not applicable.
